

# Multi-Axis Motion Control Modules

Unleash the *power* of your 1762 MicroLogix I/O with AMCI's new 3100 series two-axis motion control modules.

**Compatibility**  
MicroLogix 1762 I/O  
(1100, 1200, 1400)

## Features

- Easy to program - no extra software
- Controls servo and/or stepper drives
- Linear and circular interpolation commands
- Encoder feedback, providing closed loop

## Commands

Registration, jogging/changing speed on the fly, and blend move.

Linear and circular interpolation are exclusive to the 3102i module enabling more sophisticated motion control.

Visit [www.amci.com](http://www.amci.com) to learn about these commands, and more.

## 2 Versions

**3102**

2 Axis motion control

**3102i**

2 Axis motion control  
*plus* interpolation
