**DESCRIPTION**

The H25-FE-R4 is an AMCI size 25, flange mount, single turn transducer with an end connector that is a bolt-in replacement for most flange mount optical encoders. Its NEMA 4 (IP 65) rating means it will survive most industrial applications including washdowns. This transducer is electrically identical to Autotech Controls E7R resolvers but has the standard AMCI MS connector. Note that this resolver will not work with most of AMCI's controllers without additional equipment.

The outline drawing below details our standard unit with a 3/8" shaft. This transducer is also available with a 1/4" or 10mm shaft or a 3/8" shaft with a three millimeter keyway under the following part numbers. Dimensional drawings of these shafts are on the next page.

H25-FE-R4-03: 1/4" Dia. Shaft
H25-FE-R4-06: 3/8" Dia. Shaft with 3mm Keyway
H25-FE-R4-10: 10mm Dia. Shaft
