

## AMCI Video Highlights PLC-Based Specialty I/O

Terryville, CT – Advanced Micro Controls, Inc. (AMCI) releases a 1-minute video highlighting AMCI's AnyNET I/O family. The video provides a visual snapshot of the product family including the types of specialty I/O available, compatible networks, and design features. This video has been added to the [Video section](#) on the AMCI website, where the company archives videos that include tech tutorials and product introductions.

The video can be found in trade publications, the company website and on its YouTube channel, "AMCIcontrols".

"If a picture is worth a thousand words, then a video is worth at least 10,000. With today's connected technology, it is a no-brainer to use video as a sales tool. The very nature of our product is dynamic - if we can't show that, then we as salespeople don't do the product justice." – John Davis, AMCI Sales Representative
