

## 5034-PTO-AM Module for NEW POINTMAX I/O Platform

AMCI Introduces 5034-PTO-AM High-Speed Pulse Train Output Module for Rockwell Automation PointMax™ I/O

Terryville, CT – Advanced Micro Controls Inc. (AMCI), a Rockwell Automation Technology Partner, announces the release of the 5034-PTO-AM, a high-performance Pulse Train Output module designed for the PointMax™ 5034 I/O platform. The new module delivers precise motion control functionality directly within distributed I/O architectures.

The 5034-PTO-AM provides high-speed pulse and direction outputs for controlling stepper drives, servo drives, and other motion devices that accept PTO signals. By integrating motion control at the I/O level, the module helps reduce cabinet space, wiring complexity, and overall system cost.

Designed for seamless integration with Allen-Bradley Logix controllers, the 5034-PTO-AM supports deterministic control and fast response times, making it ideal for applications requiring accurate positioning and speed control.

### Key Features:

- High-speed pulse train output for motion control applications
- Designed specifically for Rockwell Automation PointMax™ 5034 I/O
- Ideal for stepper and servo drive control
- Enables distributed motion control architectures
- Reduces panel space and system complexity
- Fully supported within Logix environments

The 5034-PTO-AM is well suited for packaging, material handling, converting, and general industrial automation applications where precise motion control is required without adding dedicated motion hardware.

**About Advanced Micro Controls Inc.**

Founded in 1985, Advanced Micro Controls, Inc. (AMCI) is a leading U.S. based manufacturer with a global presence. AMCI industrial control products improve PLC-based automation systems with specialized position sensing and motion control technology that simplifies automation and adds reliability to manufacturing processes. AMCI designs and manufactures all of their products, enabling superior quality and innovation. The company provides 24/7 technical support staff, ready to answer questions about installation, configuration and operation of all AMCI products.
